Proceedings of SPIE 0277-786X, V. 10246

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Smart Sensors, Actuators, and MEMS VIII, edited by Luis Fonseca, Mika Prunnila, Erwin Peiner, Proc. of SPIE
Vol. 10246, 1024601 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2282023

Proc. of SPIE Vol. 10246 1024601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

LIBRARY**
SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Authors*
- ix *Conference Committees*
- xiii *Introduction*

SESSION 1 MODELING AND SIMULATION I

- 10246 04 **Fluid-structure interaction modelling of the roof tile-shaped modes in piezoelectric plate microresonators** [10246-2]
- 10246 06 **Optimal design of a microgripper-type actuator based on AlN/Si heterogeneous bimorph** [10246-4]
- 10246 07 **Topologically optimised flexure hinge based XY stage** [10246-5]

SESSION 2 MODELING AND SIMULATION II

- 10246 08 **Modeling high signal-to-noise ratio in a novel silicon MEMS microphone with comb readout** [10246-6]
- 10246 09 **An FE model of a cellular polypropylene: exploring mechanical properties** [10246-8]
- 10246 0A **Efficient fluid transport by a bionically inspired micro-flapper: fluidic investigations using fully coupled finite element simulation** [10246-9]

SESSION 3 CHEMICAL AND BIOCHEMICAL SENSORS I

- 10246 0B **Development of a lab-on-chip electrochemical immunosensor for detection of Polycyclic Aromatic Hydrocarbons (PAH) in environmental water** [10246-10]
- 10246 0C **Gravimetric humidity sensor based on ZnO nanorods covered piezoresistive Si microcantilever** [10246-11]
- 10246 0D **MEMS-based array for hydrogen sulfide detection employing a phase transition** [10246-12]

SESSION 4 CHEMICAL AND BIOCHEMICAL SENSORS II

- 10246 0F **Inkjet-printed dissolved oxygen and pH sensors on flexible plastic substrates** [10246-14]
- 10246 0G **Wax microfluidics light-addressable valve with multiple actuation** [10246-15]

10246 OH **Development of biosensors for non-invasive measurements of heart failure biomarkers in saliva** [10246-16]

SESSION 5 PHYSICAL SENSORS I

10246 OI **MEMS direction finding acoustic sensor** [10246-17]

10246 OJ **A multi-functional MEMS-SPM for quantitative characterization of nano-objects** [10246-18]

10246 OK **Asymmetric resonance response analysis of a thermally excited silicon microcantilever for mass-sensitive nanoparticle detection** [10246-19]

10246 OL **Thermoelectric bolometers based on silicon membranes** [10246-20]

SESSION 6 PHYSICAL SENSORS II

10246 OM **Oscillator circuit for monitoring the gas damping effect of piezoelectric microresonators** [10246-22]

10246 ON **Comparative assessment of PVDF and PVDF-TrFE piezoelectric polymers for flexible actuators applications** [10246-23]

10246 OO **Thin film system with integrated load and temperature sensors for the technical application in deep drawing process** [10246-24]

SESSION 7 MATERIALS AND PROCESSES

10246 OP **Low cost nanomechanical surfaces stress based sensors fabricated by hybrid materials** [10246-25]

10246 OQ **Zirconium diboride thin films for use in high temperature sensors and MEMS devices** [10246-27]

10246 OR **FT-IR analysis of high temperature annealing effects in α -SiC:H thin films** [10246-28]

SESSION 8 ENERGY DEVICES I

10246 OS **Micro solid oxide fuel cells: a new generation of micro-power sources for portable applications (Invited Paper)** [10246-29]

10246 OT **Alkaline fuel cell with nitride membrane** [10246-30]

10246 OU **Parameter identification from frequency response of MEMS energy harvesters** [10246-31]

10246 OV **Powering a leadless pacemaker using a PiezoMEMS energy harvester** [10246-32]

SESSION 9 ENERGY DEVICES II

- 10246 0W **Designing, modelling and testing of vibration energy harvester with nonlinear stiffness** [10246-33]
- 10246 0X **Comparison of methods for static charge energy harvesting on aircraft** [10246-34]
- 10246 0Y **Improved thermal and electrical design for an all-Si thermoelectric micropower source** [10246-35]
- 10246 0Z **Integrated TiN coated porous silicon supercapacitor with large capacitance per foot print** [10246-36]

SESSION 10 INTERFACING AND SYSTEM INTEGRATION

- 10246 10 **Programmable differential capacitance-to-voltage converter for MEMS accelerometers** [10246-37]
- 10246 11 **Robust design of an inkjet-printed capacitive sensor for position tracking of a MOEMS-mirror in a Michelson interferometer setup** [10246-38]
- 10246 12 **Universal and inductorless DC/DC converter for multi-output power supplies in sensor and actuator networks** [10246-39]

POSTER SESSION

- 10246 13 **Anti-collision radio-frequency identification system using passive SAW tags** [10246-40]
- 10246 14 **Mini- and microgenerators applicable in the MEMS technology** [10246-41]
- 10246 16 **Modeling the microstructure of surface by applying BRDF function** [10246-43]
- 10246 17 **Actuation control of a PiezoMEMS biomimetic robotic jellyfish** [10246-44]
- 10246 18 **MEMS-based seed generator applied to a chaotic stream cipher** [10246-45]
- 10246 19 **Analyses of electromagnetic and piezoelectric systems for efficient vibration energy harvesting** [10246-46]
- 10246 1A **Gold/polypyrrole nanorods for gas sensing application** [10246-47]
- 10246 1B **Four segment piezo based micropump** [10246-48]
- 10246 1C **Computational model and simulation for the whispering gallery modes inside micro-optical cavity** [10246-49]
- 10246 1E **Influence of binding material of PZT coating on microresonator's electrical and mechanical properties** [10246-51]

- 10246 1F **Colorimetric sensor for bad odor detection using automated color correction** [10246-52]
- 10246 1G **Temperature simulation at ZnO surface processed by laser interference lithography**
[10246-53]
- 10246 1H **Innovative metal thermo-compression wafer bonding for microelectronics and MEMS devices** [10246-54]
- 10246 1I **Characterization of oscillator circuits for monitoring the density-viscosity of liquids by means of piezoelectric MEMS microresonators** [10246-55]
- 10246 1J **Radio link design framework for WSN deployment and performance prediction** [10246-56]
- 10246 1K **User centered integration of Internet of Things devices** [10246-57]
- 10246 1L **Identification of squid species by melting temperature shifts on fluorescence melting curve analysis (FMCA) using single dual-labeled probe** [10246-58]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Session Chairs

- 1 Modeling and Simulation I
Michele Pozzi, Newcastle University (United Kingdom)
- 2 Modeling and Simulation II
Jacopo Iannacci, Fondazione Bruno Kessler (Italy)
- 3 Chemical and Biochemical Sensors I
Mika Prunnila, VTT Technical Research Centre of Finland Ltd. (Finland)
- 4 Chemical and Biochemical Sensors II
Jürgen Wöllenstein, Fraunhofer-Institut für Physikalische Messtechnik (Germany)

- 5 Physical Sensors I
Robert J. Lad, The University of Maine (United States)
- 6 Physical Sensors II
Sören Fricke, Centre Suisse d'Electronique et de Microtechnique SA
(Switzerland)
- 7 Materials and Processes
Erwin Peiner, Technische Universität Braunschweig (Germany)
- 8 Energy Devices I
Gemma García Mandayo, CEIT-IK4 (Spain)
- 9 Energy Devices II
Nathan M. Jackson, Tyndall National Institute (Ireland)
- 10 Interfacing and System Integration
Luis Fonseca, Centro Nacional de Microelectrónica, CSIC (Spain)

Introduction

The SPIE Sensors, Actuators, and MEMS VIII conference took place in Barcelona within the 2017 edition of the SPIE Microtechnologies event.

It gave coverage to a wide breadth of topics with quite a few interlinks among them. Sessions on materials and processing, modeling and simulation, chemical and biochemical sensors, physical sensors, energy devices, and interfacing and systems issues followed for three intense days covering the full food chain of microdevices. Remarkably enough, most of the talks were given by young researchers.

In terms of microtechnologies, silicon technologies, printing technologies, and hybrid technologies were considered making use of both silicon and non-silicon materials. In terms of applications, the devices considered were thought to contribute to increasing environmental smartness, and to nurturing wearables or IoT nodes.

This conference program suited well the overall goal of the SPIE Microtechnologies event, completing the scope of other concurrent conferences: it went a step further into devices than the Nanotechnology VIII conference and complemented the type of devices envisioned in the Bio-MEMS and Medical Microdevices III conference.

Moreover, the Sensors, Actuators, and MEMS VIII program also complemented very well with the SPIE Microtechnologies plenary talks, which dealt with graphene technologies as an enabling material for bioelectronics, MEMS microphone innovations which is an outstanding market success of a silicon microdevice, and the energy efficiency challenge of smart microsystems which illustrated the system-wise energy challenges of making sensor nodes deployable in IoT scenarios in an effective and sustainable way.

Extended abstracts of most of the presented works at Sensors, Actuators and MEMS VIII have found their way into this SPIE proceedings volume, which are now available for further consultation.
