

# PROCEEDINGS OF SPIE

## ***High-Power Laser Ablation VIII***

**Claude R. Phipps**

*Editors*

**26 February – 1 March 2024**

**Santa Fe, New Mexico, United States**

*Sponsored and Published by*  
SPIE

**Volume 12939**

Proceedings of SPIE 0277-786X, V. 12939

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High-Power Laser Ablation VIII, edited by Claude R. Phipps, Vitaly E. Gruzdev, Proc. of SPIE  
Vol. 12939, 1293901 · © 2024 SPIE · 0277-786X · doi: 10.1117/12.3031990

Proc. of SPIE Vol. 12939 1293901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *High-Power Laser Ablation VIII*, edited by Claude R. Phipps, Proc. of SPIE 12939, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## LASER-INDUCED MODIFICATIONS OF MATERIAL MICROSTRUCTURE AND SURFACE MORPHOLOGY

---

- 12939 02 **On the study of electron-phonon and phonon-phonon coupling in femtosecond laser-excited tungsten** [12939-6]
- 12939 03 **Volumetric glass modification with Gaussian and doughnut-shaped pulses: from localized laser-energy absorption to absorption delocalization** [12939-7]
- 12939 04 **Effects of nanoparticles on plasma shielding at pulsed laser ablation of metal targets** [12939-8]

---

## KEYNOTE SESSION I

---

- 12939 05 **Design of first experiment to achieve fusion target gain > 1 (Keynote Paper)** [12939-1]

---

## LATEST RESULTS IN LASER-MATTER INTERACTIONS AND APPLICATIONS

---

- 12939 06 **Effect of laser-induced periodic surface structures on the wettability and surface energy of polymers** [12939-11]
- 12939 07 **Ultrashort and short-pulse laser ablation for chemical element analysis and thin film deposition of complex materials** [12939-12]
- 12939 08 **Analysis of hydrogen and lithium isotopes using laser-induced breakdown spectroscopy** [12939-14]

---

## LASER MATERIALS INTERACTION IN LIQUID ENVIRONMENT

---

- 12939 09 **Chemical strategies for tailoring properties of nanomaterials produced by pulsed laser interaction in liquid environments** [12939-17]

---

## LASER ABLATION FOR PLD AND MAPLE I

---

- 12939 0A **Stability, structural, optical, and morphological properties of cesium lead bromine films deposited by laser ablation** [12939-20]

---

#### LASER ABLATION FOR PLD AND MAPLE II

---

- 12939 0B **Large area pulsed laser deposition of SrVO<sub>3</sub> thin films** [12939-23]
- 12939 0C **Pulsed laser deposition using high-power Nd:YAG laser source operating at its first harmonics: recent approaches and advances** [12939-26]

---

#### HIGH-POWER LASERS IN DIRECTED ENERGY

---

- 12939 0D **Fiber lasers for directed energy** [12939-28]
- 12939 0E **Beam-combinable high-power fiber laser sources for directed energy applications** [12939-30]

---

#### HIGH-POWER ULTRASHORT LASERS FOR MATERIALS SCIENCE AND PARTICLE ACCELERATION I

---

- 12939 0F **Dual-wavelength femtosecond laser-induced low-fluence single-shot damage and ablation of silicon** [12939-31]
- 12939 0G **Optical pumping for high-power ultrashort LWIR gas lasers** [12939-33]

---

#### HIGH-POWER ULTRASHORT LASERS FOR MATERIALS SCIENCE AND PARTICLE ACCELERATION II

---

- 12939 0H **Compact chirp-free ps-pulse wedged thin-disk amplifier** [12939-34]
- 12939 0I **Role of electron-phonon and phonon-phonon coupling in the non-equilibrium dynamics simulations of laser-excited metals** [12939-78]

---

#### SPACE DEBRIS: METHODS OF AVOIDING COLLISIONS AND RE-ENTERING DEBRIS

---

- 12939 0J **Impact of material and surface properties on thermo-mechanical coupling in laser-based orbit modification of space debris** [12939-93]

---

#### LASER-INDUCED SHOCK APPLICATIONS

---

- 12939 0K **New advancements for laser-matter interaction applied to laser shock peening** [12939-41]

- 12939 OL **Particle adhesion assessment based on a diverted use of laser shock adhesion test (LASAT) to apply inertia force relying on dynamics of the sample macroscopic surface** [12939-42]
- 12939 OM **Effects of pulsed laser and electron-beam irradiation on protected aeronautical CFRP composite laminate to enhance the modelling of lightning-strike damage** [12939-43]

---

#### TERAWATTS TO PETAWATTS: LASER AND SECONDARY SOURCES FOR SOCIETAL APPLICATIONS

---

- 12939 ON **K $\alpha$  x-ray source size based on high-intensity femtosecond laser-solid interaction: generation and applications** [12939-50]
- 12939 OO **Development, operations, and applications of TW to PW lasers at the BELLA Center for plasma-based particle acceleration studies** [12939-52]

---

#### FUNDAMENTALS OF ULTRASHORT LASER-MATERIALS INTERACTIONS: THEORY AND SIMULATIONS

---

- 12939 OP **Laser material interaction of undoped and doped silicon** [12939-59]

---

#### TIME-RESOLVED IMAGING AND PROBING OF ABLATION PLUMES AND MATERIALS TRANSFORMATIONS

---

- 12939 OQ **Atomistic modelling of ultrafast laser-induced melting in copper** [12939-61]
- 12939 OR **Laser-epoxy interaction and plume shielding in the presence of crossflow** [12939-63]

---

#### EMERGING LASER-ENABLED APPLICATIONS

---

- 12939 OS **Advancements in high-speed surface micro/nanostructuring using multi-beam processing approaches** [12939-64]
- 12939 OT **Petawatt-class gamma bursts driven by next-generation high-intensity lasers** [12939-66]

---

#### BIOLOGICAL APPLICATIONS OF LASERS

---

- 12939 OU **Numerical analysis of the mechanisms involved in integrated THz imaging with a NIR femtosecond laser illumination** [12939-70]

## POSTER SESSION

---

- 12939 0V **Realization of phase perturbations by deformable mirror towards testing statistical nonlinear optics** [12939-74]
- 12939 0W **Liquid water collisional model for nonlinear underwater laser interactions (Best Poster Award - Second Place)** [12939-75]
- 12939 0X **Guiding properties of longitudinal discharge nitrogen laser channel** [12939-76]
- 12939 0Y **Modeling the density response in gold after XUV and optical excitation (Best Poster Award - First Place)** [12939-79]
- 12939 0Z **On laser ablation of common optical materials** [12939-80]
- 12939 10 **Characterization of nanoparticles of TiO<sub>2</sub> and ZnO generated by pulsed laser ablation in liquids** [12939-81]
- 12939 11 **Neodymium-doped laser gain ceramics: exploring Nd as an active laser ion in YAG and fine-grain Al<sub>2</sub>O<sub>3</sub> ceramics** [12939-83]
- 12939 12 **The role of laser wavelength on the early-stage electron density evolution in laser-produced plasma** [12939-87]
- 12939 13 **Pulsed laser ablation technique prepared gold nanoparticle in zinc tetraphenyl porphyrin for enhanced nonlinear optical response** [12939-88]

# Conference Committee

## *Conference Chair*

**Claude R. Phipps**, Photonic Associates, LLC (United States)

## *Conference Co-chair*

**Vitaly E. Gruzdev**, The University of New Mexico (United States)

## *Conference Program Committee*

**Victor V. Appolonov**, A. M. Prokhorov General Physics Institute of the RAS (Russian Federation)

**Michel Boustie**, Ecole Nationale Supérieure de Mécanique et d'Aérotechnique (France)

**Nadezhda M. Bulgakova**, HiLASE Center (Czech Republic)

**Eric W. Davis**, The Aerospace Corporation (United States) and Center for Astrophysics, Space Physics & Engineering Research, Baylor University (United States)

**Richard F. Haglund Jr.**, Vanderbilt University (United States)

**Victor H. Hasson**, Consultant (United States)

**Hideyuki Horisawa**, Tokai University (Japan)

**Andrey A. Ionin**, P. N. Lebedev Physical Institute of the RAS (Russia)

**Tatiana E. Itina**, Laboratoire Hubert Curien, University of Saint-Etienne, CNRS (France)

**Andreï V. Kanaev**, Laboratoire des Sciences des Procédés et des Matériaux (France)

**Wolfgang Kautek**, Universität Wien (Austria)

**Kimiya Komurasaki**, The University of Tokyo (Japan)

**Thomas K. Lippert**, Paul Scherrer Institut (Switzerland)

**Gérard A. Mourou**, Laboratoire pour l'Utilisation des Lasers Intenses, École Polytechnique (France) and University of Michigan (United States)

**Ross Muenchausen**, Los Alamos National Laboratory (United States)

**Leik N. Myrabo**, Lightcraft Technologies, Inc. (United States)

**José Luis Ocaña**, Universidad Politécnica de Madrid (Spain)

**Kevin Parkin**, Parkin Research, LLC (United States)

**Johannes D. Pedarnig**, Johannes Kepler University Linz (Austria)

**Joseph R. Peñano**, U.S. Naval Research Laboratory (United States)

**Baerbel Rethfeld**, Rheinland-Pfälzische Technische Universität Kaiserslautern-Landau (Germany)

**Yuri A. Rezunkov**, Research Institute of Optoelectronic  
Instrumentation (Russian Federation)  
**Thierry Sarnet**, Centre National de la Recherche Scientifique (France)  
**Klaus Sokolowski-Tinten**, Universität Duisburg-Essen (Germany)  
**Rongqing Tan**, Institute of Electronics, Chinese Academy of Sciences  
(China)  
**Anthony R. Valenzuela**, U.S. Army Research Laboratory  
(United States)  
**Leonid V. Zhigilei**, University of Virginia (United States)
