Volume 7484

Proceedings of SPIE, 0277-786X, v. 7484

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optically Based Biological and Chemical Detection for Defence V*, edited by John C. Carrano, Charles J. Collins, Proceedings of SPIE Vol. 7484 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, sans-serif font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height from left to right, with a curved line above them.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- v *Conference Committee*
- vii *Joint research for tomorrow's security and defence (Plenary Paper) [7483-31]*
R. Krug, The Federal Ministry of Defence (Germany)

SESSION 1 CHEMICAL SENSING

- 7484 02 **Laser based in-situ and standoff detection of chemical warfare agents and explosives (Invited Paper) [7484-01]**
C. K. N. Patel, Pranalytica, Inc. (United States) and Univ. of California, Los Angeles (United States)
- 7484 03 **Long range standoff detection of chemical and explosive hazards on surfaces (Invited Paper) [7484-02]**
A. W. Fountain III, S. D. Christesen, J. A. Guicheteau, U.S. Army Edgewood Chemical Biological Ctr. (United States); W. F. Pearman, U.S. Military Academy (United States); T. Chyba, ITT Advanced Engineering & Sciences (United States)
- 7484 04 **Dusty plasmas for on-site spectroscopic analysis of water sources [7484-03]**
J. Sweeney, C. G. Wilson, Louisiana Tech Univ. (United States)
- 7484 05 **Liquid explosive detection from outside of the bottle by NIR [7484-04]**
H. Itozaki, Y. Yamauchi, Osaka Univ. (Japan)
- 7484 06 **Broad band tunable quantum cascade lasers for stand-off detection of explosives [7484-05]**
B. Hinkov, F. Fuchs, J. M. Kaster, Q. Yang, W. Bronner, R. Aidam, K. Köhler, Fraunhofer-Institut für Angewandte Festkörperphysik (Germany)

SESSION 2 LIDAR

- 7484 07 **Mobile demonstrator for biological aerosol standoff detection (Invited Paper) [7484-06]**
S. Frey, H. Wille, JENOPTIK Laser, Optik, Systeme GmbH (Germany); F. Wilsenack, Wehrwissenschaftliches Institut für Schutztechnologien - ABC-Schutz (Germany)
- 7484 08 **Bioaerosols standoff detection simultaneously refereed with particle concentration (ppl) and viability units (ACPLA) [7484-07]**
S. Buteau, J.-R. Simard, S. Rowsell, Defence Research and Development Canada (Canada)
- 7484 09 **UV-LIF lidar for standoff BW aerosol detection [7484-08]**
R. J. Hopkins, S. J. Barrington, M. J. Castle, K. L. Baxter, N. V. Felton, J. Jones, C. Griffiths, V. Foot, K. Risbey, Defence Science and Technology Lab. (United Kingdom)

SESSION 3 DIAGNOSTICS/BIO SENSING I

- 7484 0C **Deep ultraviolet semiconductor light sources for sensing and security (Invited Paper)**
[7484-18]
M. Shatalov, Y. Bilenko, J. Yang, R. Gaska, Sensor Electronic Technology, Inc. (United States)
- 7484 0F **Rapid test for the detection of hazardous microbiological material** [7484-14]
M. Mordmueller, Clausthal Univ. of Technology (Germany); C. Bohling, A. John, SECOPTA GmbH (Germany); W. Schade, Clausthal Univ. of Technology (Germany) and Fraunhofer Institute for Telecommunications (Germany)

SESSION 4 DIAGNOSTICS/BIO SENSING II

- 7484 0H **LIF bio-aerosol threat triggers: then and now (Invited Paper)** [7484-16]
R. DeFreez, ICx Biodefense (United States)
- 7484 0I **Evaluation of biological aerosol stand-off detection at a field trial** [7484-17]
P. Jonsson, M. Elmqvist, O. Gustafsson, F. Kullander, R. Persson, G. Olofsson, T. Tjärnhage, Swedish Defence Research Agency (Sweden); Ø. Farsund, T. V. Haavardsholm, G. Rustad, Norwegian Defence Research Establishment (Norway)

Author Index

Conference Committee

Symposium Chairs

David H. Titterton, Defence Science and Technology Laboratory
(United Kingdom)

Reinhard R. Ebert, FGAN-FOM Research Institute for Optronics and
Pattern Recognition (Germany)

Conference Chairs

John C. Carrano, Carrano Consulting (United States)

Charles J. Collins, Luminex Corporation (United States)

Program Committee

David W. Cullin, ICx Technologies (United States)

Richard K. DeFreez, ICx Mesosystems (United States)

Sherry A. Dunbar, Luminex Corporation (United States)

E. Virginia Foot, Defence Science and Technology Laboratory (United
Kingdom)

William F. Hug, Photon Systems, Inc. (United States)

Thomas H. Jeys, MIT Lincoln Laboratory (United States)

Mikael Lindgren, Norwegian University of Science and Technology
(Norway)

C. Kumar N. Patel, Pranalytica, Inc. (United States)

David W. Sickenberger, U.S. Army Research, Development and
Engineering Command (United States)

Session Chairs

- 1 Chemical Sensing
Charles J. Collins, Luminex Corporation (United States)
- 2 LIDAR
Charles J. Collins, Luminex Corporation (United States)
- 3 Diagnostics/Bio Sensing I
Charles J. Collins, Luminex Corporation (United States)
- 4 Diagnostics/Bio Sensing II
Todd Austin, Microfluidics Systems Inc. (United States)
