Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Introduction

This is the 16th volume of the series of conferences on Enhanced and Synthetic Vision.

After the first two proceedings volumes numbered 2220 (in 1994) and 2463 (in 1995), the proceedings volumes were systematically titled "Enhanced and Synthetic Vision YEAR," where YEAR stands for the year the conference was held: Proceedings of SPIE Vols. 2736 (1996), 3088 (1997), 3364 (1998), 3691 (1999), 4023 (2000), 4363 (2001), 4713 (2002), 5081 (2003), 5424 (2004), 5802 (2005), 6226 (2006), 6559 (2007), 6957 (2008), and 7328 (2009).
