SPIE

Volume 9568

Proceedings of SPIE 0277-786X, V. 9568

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Organic Field-Effect Transistors XIV; and Organic Sensors and Bioelectronics VIII, edited by Iain McCulloch, Oana D. Jurchescu, Ioannis Kymissis, Ruth Shinar, Luisa Torsi, Proc. of SPIE Vol. 9568, 956801
© 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2218174

Proc. of SPIE Vol. 9568 956801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Authors*
vii *Conference Committees*

Part A Organic Field-Effect Transistors XIV

DEVICE PHYSICS I

- 9568 05 **Ambipolar organic permeable base transistors [9568-104]**

NOVEL DEVICES / APPLICATIONS

- 9568 0A **Top-gate organic field-effect transistors fabricated on shape-memory polymer substrates [9568-108]**

FROM SINGLE CRYSTALS TO LARGE-AREA ELECTRONICS

- 9568 0D **Deposition of composite materials using a wire-bar coater for achieving processability and air-stability in Organic Field-Effect Transistors (OFETs) (Invited Paper) [9568-111]**

DEVICE PHYSICS II

- 9568 0I **Device operation mechanism of field-effect transistors with high mobility donor-acceptor polymer semiconductors (Invited Paper) [9568-116]**
- 9568 0J **Study on contact and channel resistance of pentacene-based ambipolar organic thin-film transistors [9568-117]**

FABRICATION

- 9568 0M **Fabrication of a high-resolution roll for gravure printing of 2 μ m features [9568-120]**

PROCESSING EFFECTS ON PERFORMANCE

- 9568 0Z **Thiophene-based monolayer OFETs prepared by Langmuir techniques [9568-134]**

POSTER SESSION

- 9568 15 **Importance of surface modification of a micro-contact stamp for pattern fidelity of soluble organic semiconductors** [9568-140]
- 9568 1A **Gate dielectric surface treatments for performance improvement of poly(3-hexylthiophene-2,5-diyl) based organic field-effect transistors** [9568-145]

Part B *Organic Sensors and Bioelectronics VIII*

ORGANIC SENSORS AND BIOELECTRONICS I

- 9568 1E **Fully printed metabolite sensor using organic electrochemical transistor** [9568-202]
- 9568 1I **Advances in OLED/OPD-based spectrometer on-a-chip (Invited Paper)** [9568-234]

ORGANIC SENSORS AND BIOELECTRONICS II

- 9568 1L **A paper-based all organic ion sensor (Invited Paper)** [9568-208]

ORGANIC SENSORS AND BIOELECTRONICS IV

- 9568 1W **Solution-processed non-polymeric organic photodiodes** [9568-219]

ORGANIC SENSORS AND BIOELECTRONICS V

- 9568 23 **Label-free sensors based on perylene diimide-doped polystyrene distributed feedback lasers** [9568-226]

POSTER SESSION

- 9568 2B **Optical absorbance of P3HT thin films used to estimate simultaneously thin-film thickness and morphology for gas sensing** [9568-233]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committees

Symposium Chair

Zakya H. Kafafi, Lehigh University (United States)

Part A Organic Field-Effect Transistors XIV

Conference Chairs

Iain McCulloch, King Abdullah University of Science and Technology
(Saudi Arabia)

Oana D. Jurchescu, Wake Forest University (United States)

Session Chairs

- 1 Device Physics I
Ananth Dodabalapur, The University of Texas at Austin (United States)
- 2 Novel Devices / Applications
David J. Gundlach, National Institute of Standards and Technology
(United States)
- 3 From Single Crystals to Large-area Electronics
John E. Anthony, University of Kentucky (United States)
- 4 Device Physics II
Brian Cobb, Holst Center (Netherlands)
- 5 Fabrication
Aram Amassian, King Abdullah University of Science and Technology
(Saudi Arabia)
- 6 New Materials
Iain McCulloch, King Abdullah University of Science and Technology
(Saudi Arabia)
- 7 Morphology
Hugo A. Bronstein, University College London (United Kingdom)
- 8 Processing Effects on Performance
Oana D. Jurchescu, Wake Forest University (United States)

Part B Organic Sensors and Bioelectronics VIII

Conference Chairs

Ioannis Kymissis, Columbia University (United States)
Ruth Shinar, Iowa State University of Science and Technology
(United States)
Luisa Torsi, Università degli Studi di Bari Aldo Moro (Italy)

Conference Program Committee

Magnus Berggren, Linköping Universitet (Sweden)
Annalisa Bonfiglio, Università degli Studi di Cagliari (Italy)
Fabio Cicoira, Ecole Polytechnique de Montréal (Canada)
Alon Gorodetsky, University of California, Irvine (United States)
Emil J. W. List-Kratochvil, Technische Universität Graz (Austria)
George G. Malliaras, Ecole Nationale Supérieure des Mines de
Saint-Étienne (France)
Paul Meredith, The University of Queensland (Australia)
Róisín M. Owens, Ecole Nationale Supérieure des Mines de
Saint-Étienne (France)
Manijeh Razeghi, Northwestern University (United States)
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)
Franky So, University of Florida (United States)

Session Chairs

- 1 Organic Sensors and Bioelectronics I
Luisa Torsi, Università degli Studi di Bari Aldo Moro (Italy)
- 2 Organic Sensors and Bioelectronics II
Marco Rolandi, University of Washington (United States)
- 3 Organic Sensors and Bioelectronics III
Paul L. Burn, The University of Queensland (Australia)
- 4 Keynote Joint Session with Conferences 9550 and 9568
Ruth Shinar, Iowa State University of Science and Technology
(United States)
Manijeh Razeghi, Northwestern University (United States)
- 5 Organic Sensors and Bioelectronics IV
Ioannis Kymissis, Columbia University (United States)
- 6 Organic Sensors and Bioelectronics V
Joseph Shinar, Iowa State University of Science and Technology
(United States)
