Volume 12124

Proceedings of SPIE 0277-786X, V. 12124

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Unmanned Systems Technology XXIV, edited by Hoa G. Nguyen, Paul L. Muench, Brian K. Skibba,
Proc. of SPIE Vol. 12124, 1212401 · © 2022 SPIE · 0277-786X · doi: 10.1117/12.2644018

Proc. of SPIE Vol. 12124 1212401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Unmanned Systems Technology XXIV*, edited by Hoa G. Nguyen, Paul L. Muench, Brian K. Skibba, Proc. of SPIE 12124, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

UNMANNED SYSTEMS DESIGN

- 12124 02 **Small robotics mapping and autonomy for programs of record** [12124-5]
12124 03 **Quad-cone-rotor: a novel tilt quadrotor with severe-fault-tolerant ability** [12124-2]

SENSING, PROCESSING, AND SAFETY FOR GROUND VEHICLES I: JOINT SESSION WITH CONFERENCES 12115 AND 12124

- 12124 04 **Leader-follower game theory approach for adversarial agents with sensing limitations** [12124-6]
12124 05 **MONST3R: miniature optical navigation system through 3D recognition** [12124-7]

SENSING, PROCESSING, AND SAFETY FOR GROUND VEHICLES II: JOINT SESSION WITH CONFERENCES 12115 AND 12124

- 12124 06 **How extending the kinematic model affects path following in off-road terrain for differential drive UGVs** [12124-8]
12124 07 **An anticipatory dynamic bayesian network approach towards an autonomous vehicle safety reasoning system** [12124-10]
12124 08 **Using an enhanced OBD to increase safety in a VANET scenario** [12124-9]

SELF-ORGANIZING, COLLABORATIVE, UNMANNED ROBOTICS TEAMS: JOINT SESSION WITH CONFERENCES 12119 AND 12124

- 12124 09 **A deep-learning, vision-based framework for testing swarm algorithms using inexpensive mini drones** [12124-12]
12124 0A **Visual homing for robot teams: do you see what I see?** [12124-14]
12124 0B **Transformers and deep CNNs for unmanned aerial vehicles detection** [12124-15]

SENSING, COMMUNICATIONS, AND CONTROL

- 12124 0C **Task-based assessment of image compression methods and products** [12124-16]
- 12124 0D **Effect of clouds and rain rate on the BER performance of ground-to-UAV free space optical communication system** [12124-17]
- 12124 0E **HDR luminance normalization via contextual facilitation in highly recurrent neuromorphic spiking networks** [12124-20]

AI/ML AND UNMANNED SYSTEMS: JOINT SESSION WITH CONFERENCES 12113 AND 12124

- 12124 0F **Benchmarking domain adaptation for semantic segmentation** [12124-21]
- 12124 0G **A fast object recognizer with a very small number of information using human cognitive-inspired computation model** [12124-23]

POSTER SESSION

- 12124 0H **Image-based navigation system using skylight polarization for an unmanned ground vehicle** [12124-32]
- 12124 0I **The application of the SVSF into maneuvering system using FPGA** [12124-28]
- 12124 0J **An asymptotic distribution theory with applications to adaptive decision and control** [12124-29]
- 12124 0K **Statemental credibility logic for intelligent systems** [12124-30]
- 12124 0L **An adaptive Monte Carlo test for uncertain discrete-event dynamic systems** [12124-31]
- 12124 0M **Algorithm for creating a single image of the cutting machine processing field and automated object detection when cutting parts** [12124-26]
- 12124 0N **Algorithm for the automated construction of the movement curve of the working tool with the possibility of interpolation of the step function of the displacement used to control gantry machines** [12124-27]

Conference Committee

Symposium Chairs

Augustus W. Fountain III, University of South Carolina (United States)
Teresa L. Pace, L3Harris Technologies, Inc. (United States)

Program Track Chair

Tien Pham, CCDC Army Research Laboratory (United States)

Conference Chairs

Hoa G. Nguyen, Office of Naval Research Global (United States)
Paul L. Muench, U.S. Army Ground Vehicle Systems Center
(United States)
Brian K. Skibba, U.S. Air Force Civil Engineer Center (United States)

Conference Program Committee

Michael H. Bruch, Naval Information Warfare Center Pacific
(United States)
Jared Giesbrecht, Defence Research and Development Canada,
Suffield (Canada)
Sridhar Lakshmanan, University of Michigan-Dearborn (United States)
Daniel Lofaro, U.S. Naval Research Laboratory (United States)
Larry H. Matthies, Jet Propulsion Laboratory (United States)
Camille S. Monnier, Charles River Analytics, Inc. (United States)
Dilip G. Patel, General Dynamics Robotic Systems (United States)
Raja Suresh, General Dynamics Mission Systems (United States)
