Proc. of SPIE Vol. OICE100 1230801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

v *Conference Committee*

INTERNATIONAL CONFERENCE ON OPTOELECTRONIC INFORMATION AND COMPUTER ENGINEERING (OICE 2022)

12308 02	Implementation of marine situation plotting system combining normal trajectory model [12308-1]
12308 03	Reconfigurable mode (de)multiplexer based on a thermo-optic asymmetric directional coupler formed with three parallel waveguides [12308-4]
12308 04	A microwave sensor for wrist pulse detection using self-oscillating CSRR [12308-5]
12308 05	Derivative fourier transform spectroscopy and imaging using stepwise superimpose strategy [12308-6]
12308 06	Broadband optical radiometric calibration method based on monochromator light source with high precision [12308-7]
12308 07	Calibration of fiber optic hydrophone based on heterodyne demodulation technology [12308-8]
12308 08	Design and implementation of portable laser axes testing system for anti-tank missile [12308-9]
12308 09	Research on calibration device of laser demarcation instruments [12308-14]
12308 0A	The tracing of circuit series resonance point and the confirmation of Q point based on Multisim 12 [12308-16]
12308 0B	Computer simulation of processes in the resonator length control system of the Zeeman laser gyro [12308-17]
12308 0C	Aureole stability simulation of LCOS based on OpenGL [12308-18]
12308 0D	Method of generating program path test cases based on neural network [12308-20]
